## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, and 7-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Duke Jr et al. Duke Jr. et al shows the use of a chair cover having first and second cover surfaces having a non-elastic flap (17) in order to form a pocket (18). The first and second cover surfaces along with a side pocket (20) may be disposed within the pocket upon folding and rolling up of the chair cover.

3. Claims 1-5, and 7-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Goddard. Goddard shows the use of a chair cover (100,200) having first and second covers surfaces having a non-elastic flap (31,230) in order to form a pocket. The first and second cover surfaces along with a side pocket (80,82) may be disposed within the pocket upon folding and rolling up of the chair cover.

### ***Response to Arguments***

4. Applicant's arguments filed 9/10/02 have been fully considered but they are not persuasive. In response to applicant's argument that Goddard and Duke both fail "to describe a chair cover in which...said second cover surface forms a plurality of substantially square corners and said substantially square corners retain their shape when said pocket is disposed over said chair", the examiner is of the opinion that both Goddard and Duke would in fact form a

**“plurality of substantially square corners”** upon the chair cover being placed on a chair having completely square corners. Goddard teaches that the cover is **“generally rectilinear** and as shown **conforms** generally in size to...the chaise lounge frame“ (see col. 2 lines 63-65) while Duke teaches that the **“pockets are slightly tapered to conform** to the shapes of the cantilevered chair frames or sections” (col.2 lines 16-17).

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.
